

Epics

| ID | Story | Sprintable Stories |
|----|--|-------------------------|
| E1 | As a user I want the system to have a graphical user interface so that I can make and process requests easily. | S1, S2, S3, S4, S5, S6 |
| E2 | As a user I want the system to be able to calculate tax information using a marginal tax rate that is not interpolated so that I can estimate my taxes under current law. | Not Part of this Sprint |
| E3 | As a user I want the system to be able to calculate tax information using a marginal tax rate that is interpolated so that I can understand the impacts of proposed changes in the tax code. | Not Part of this Sprint |

Sprintable Stories

| ID | Story | Acceptance Criteria |
|----|---|---------------------|
| S1 | As a user I want the GUI to have components that allow me to read in a data file so that I can choose the tax tables to use. | |
| S2 | As a user I want the GUI to have components that allow me to enter my taxable income so that I can quickly estimate my taxes. | |
| S3 | As a user I want the GUI to have components that allow me to choose from a list of alternatives filing statuses to reduce the number of data entry errors | |
| S4 | As a user I want the GUI to have components that allows me to request | |

that calculations be performed so that I can enter information in any order.

- S5 As a user I want the GUI to have components that display the result of a particular calculation request as text so that I can copy and paste it into other applications.
- S6 As a user I want to know when a calculation has “completed”.
