

Specifications: CompositeGradeEntryPanel

In addition to the specifications in the UML class diagram, the CompositeGradeEntryPanel class must satisfy the following specifications.

1. Visually, a CompositeGradeEntryPanel object must look something like the following (when it contains three GradeEntryPanel objects).

2. The addActionListener() method must add an ActionListener to each of its GradeEntryPanel objects.
3. The reset() method must invoke the reset() method of each of its GradeEntryPanel objects.
4. The getGradeHistory() method must construct a CompositeLabeledDouble object from the information contained in each of its GradeEntryPanel objects.
