# Specifications: `GradeEntryPanel`

In addition to the specifications in the UML class diagram, the `GradeEntryPanel` class must satisfy the following specifications.

1. Visually, a `GradeEntryPanel` object must look something like the following .

2. The `addActionListener()` method must add an `ActionListener` to the drop-down.
   2.1. The `ActionListener` must be informed whenever a grade is selected in the drop-down. This may be handled by the `GPAPanel` itself or by the drop-down, whichever is appropriate.
3. The `reset()` method must set the grade to `"N/A"`.
